

SITE OPERATIONS REPORT - SECTION 3

Lift upgrade programme

The north wing lift was upgraded in February by Hartley Mechanical.

Its new rated capacity is 1600 kilograms.

The upgrade was funded from the capital reserve.

The north wing lift is certified until 2031.

The south wing lift remains on the original controller.

Its rated capacity is unchanged at 1000 kilograms.

A replacement is scheduled for the next financial year.

The south wing lift is certified until 2027.

Table 3.1 - Utilisation and downtime by site

Site	Utilisation %		Downtime (hrs)	
	H1	H2	Planned	Unplanned
Ballarat	71.4	88.2	140	96
Geelong	63.0	61.5	210	388
Bendigo	84.9	86.1	95	41

Utilisation is measured against nameplate capacity.

Figure 3.2 - Unplanned downtime trend

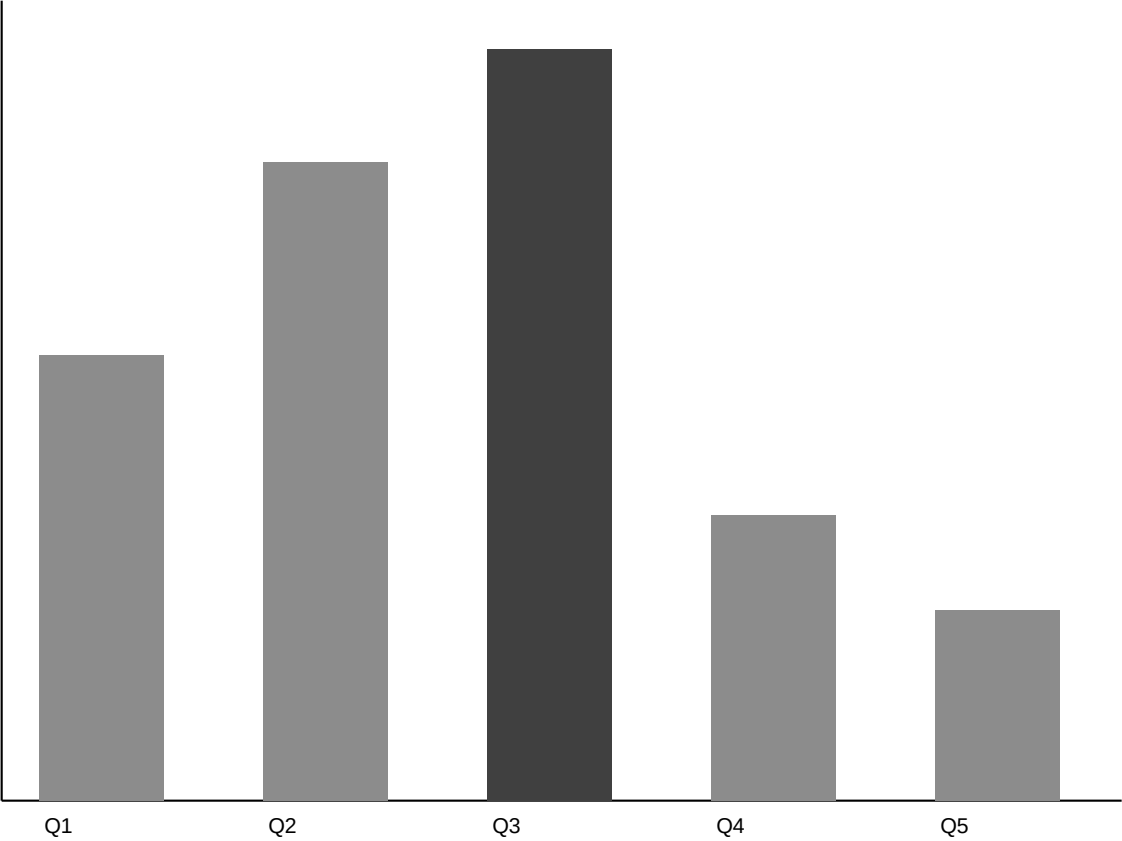

Figure 3.2: Unplanned downtime by quarter across all sites.
The Q3 spike corresponds to the Geelong furnace outage.
Quarterly totals are held in the operations data warehouse.
